

THE  
UNIVERSITY  
OF RHODE ISLAND  
GEORGE & ANNE RYAN  
INSTITUTE FOR  
NEUROSCIENCE

## **Proposal Submission Guidelines**

The George & Anne Ryan Institute for Neuroscience at the University of Rhode Island supports innovative research and collaborative partnerships that contribute to the development of therapies for neurodegenerative diseases. We are committed to integrating discovery science, translational medicine, education, and community engagement to develop and deliver tomorrow's treatments today. The Institute will provide resources to support these efforts, including assistance in grant preparation, seed and pilot funding and the facilitation of local, regional and national collaborations.

The University recognizes the importance of this work in advancing its mission and has agreed to support the continued growth of the Institute by allocating to the Institute a portion of the indirect costs associated with grants submitted by Ryan Institute Faculty or Ryan Institute Collaborating Faculty. Grants will be considered eligible for this indirect cost allocation if the criteria below are met. Please answer "Yes" or "No" using the drop-down menu after each question.

**1. The Principal Investigator(s) is a member of the Ryan Institute Faculty or Ryan Institute Collaborating Faculty.**

*For information on affiliation, see [ryaninstitute.uri.edu/research/affiliation/](http://ryaninstitute.uri.edu/research/affiliation/).*

**2. The proposal advances the mission of the Institute by addressing issues relevant to the study, diagnosis and/or treatment of neurodegenerative diseases.**
